### **Our Planet: Our Business**

A 38 minute film that sets out why environmental action is crucial to humanity and to business. Super engaging content, created by WWF and SilverBack Films, the same team who shot the Our Planet series, and suitable as a conversation starter for boards of corporates.

[Our Planet: Our Business](#)

### **Our Planet: Too Big to Fail**

A 42 minute film setting out why urgent action on climate and nature matters for the finance sector and what they can do about it. Super engaging content, created by WWF and SilverBack Films, the same team who shot the Our Planet series, and suitable as a conversation starter for trustees of foundations, charities or university leadership teams. .

[Our Planet: Too Big To Fail | WWF](#)

### **Save Our Wild Isles**

A series of four films that set out the need for the protection of nature for business, finance, food and farming and anyone involved in oceans. Created by WWF and SilverBack Films, these four short films are great ways to get to grips with the importance of a nature positive strategy and case studies of real solutions available today, and to start a conversation about our impact on nature. Screenings also possible with WWF.

**GFANZ website**

Information about the important Glasgow Financial Alliance for Net Zero - the alliance launched by Mark Carney at COP26 and many of the financial institutions with various commitments to align their lending portfolio (banks), underwriting portfolio (insurance companies) and funds (asset owners/managers) to a decarbonisation pathway compatible with a 1.5 degree world. Any of the GFANZ commitments required financial institutions to set 5 year interim targets for transition. They also publish papers on various aspects of transitioning the global financial system to support transition and climate action.
