

# Leadership Themes

*“Yesterday I was clever so I wanted to change the world. Today I am wise, so I am changing myself” (Rumi)*

Our programme is organised around 2 core themes:

- **Wisdom and Personal Growth**, providing a space for a deeper authentic enquiry into the character, purpose and ambition of our leadership
- **Practical Wisdom for These Times**, providing an opportunity to share practical experience, expertise and learning around key contemporary issues

## Wisdom and Personal Growth

These tend to be longer Conversations to allow more space for reflection and deeper personal enquiry. They are transformational in nature with a focus on being as well as doing. They relate to our unfolding and maturing as leaders as we engage with the increasingly complex and demanding realities we face into. They will often lead to a sustainable shift in the clarity and quality of our personal leadership.

## Practical Wisdom for These Times

These tend to be shorter, more focused Conversations enquiring into and learning from a particular issue of our times. They provide the opportunity to lay it on the table, take it apart, have a good look, get others perspectives (and sometimes a stimulus from an expert view). Then to reframe how we are viewing it and activating this new perspective in our leadership

## **Leader To Leader Exchanges - Learning together from the Journey**

This is our zoom-based programme which provides the opportunity to engage with each other in an 'action learning' format of short monthly online connections over a period of 6 months or so. This provides an amazing space, founded in the openness and trust of the Fellowship, to pause, breathe and reflect together. This enables an honest, purposeful and transformational enquiry over a longer period – helping us see and sustain a stability of purpose as leaders amidst all the ups and downs that inevitably happen along the way.
