Ministry Statistics data tables

The figures in this spreadsheet have been compiled using live data from the People System. The People System manages personal data for all clergy licensed to minster in the Church of England. The National Register of Clergy is maintained using data from the People System. Previous ministry statistics were compiled using data from multiple sources, including the legacy people system for paid clergy and the Crockfords database; it was a labour intensive process to compile them, which took many months. These tables can be reproduced at the click of a button.

We have tried to categorise clergy in line with the previous methodology to ensure as much continuity as possible with previously published Ministry Statistics. Tab labels and table numbers have been included to help readers find similar information in previous Ministry Statistics publications, available on the Church of England website (see link below). **Please note that changes in the underlying datasets and analysis methodology mean that direct comparisons with previous statistics need to be carried out with caution and suitably caveated.** It is plausible that self supporting numbers may have been overreported in the past, as information about roles ending doesn't always reliably reach Crockfords. Some clergy also hold more than one role (see below).

It is worth noting that clergy numbers will naturally fluctuate during the year with the main influx of ordinands in June-September each year.

We are aware that a relatively small number of clergy are missing where no ordination date is held and we are working with dioceses to rectify this. The vast majority of these are self supporting/PTO.

We are also aware that a relatively small number of people are appearing in the wrong category and we are working with dioceses to correct this data.

Stipendiary clergy only includes those paid centrally and will not include clergy in the Diocese of Sodor and Man or the Diocese in Europe. It also won't include any stipendiary clergy who are paid locally. They will be recorded within the self-supporting ministry (SSM) category. Clergy in the Channel Islands are within the Diocese of Salisbury.

The data tables have been compiled by separating clergy paid centrally from those with an active role who are not paid centrally. There is minimal double counting within the stipendiary clergy as it has been possible to identify their main paid role, with the exception of a small number of clergy who work part time in the Bishop's office and part time in a parish role.

A significant number of clergy hold more than one role. We are still working on a way to reliably and sensibly categorise self-supporting clergy with multiple roles just once based on their main role; for the time being if clergy hold Permission to Officiate (PTO) in addition to an SSM role they will appear in both the SSM and PTO categories but only once in the totals. It is worth noting that any stipendiary clergy who hold an additional role, i.e. PTO or chaplaincy, will not be included within these figures as anyone with a stipendiary role has been excluded from these tables.

We are unable to break down the data by urban and rural split at this time as we cannot directly report on this data from the People System, we hope to be able to do this analysis in the future.

Ethnicity data is missing from the People System for the majority of clergy, and therefore we are currently unable to report clergy ethnicity information; a project is underway to actively encourage clergy to provide this information.

We are working to improve the reporting around the numbers of clergy joining and leaving ministry and the reasons for doing so.

We welcome any feedback, comments and suggestions and would encourage you to alert us to any errors so we can investigate and work with dioceses to correct any data. Please contact statistics.unit@churchofengland.org

Please note that this data represents the reasons for leaving the central clergy payroll during the last 12 months. Some people who left the central clergy payroll will already have returned to it after a gap, and some will have moved to different kinds of ministry (e.g. self-supporting ministry, chaplaincy, PTO).

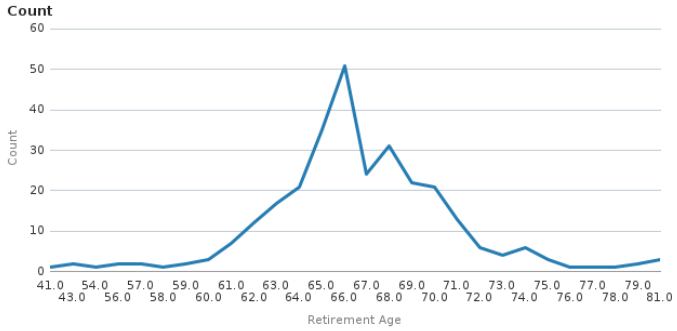

It therefore **doesn't** represent the number of people who have permanently left ministry. It is likely that some of the resignations in older age groups are in fact retirements. We are looking into ways to improve this reporting

Table 17: Number of Stipendiary clergy (on Church Commissioners' Payroll) retirees, by age, in the last 12 months

Retirement Age Band	Count
